Special “High Flow” Tour Series

Guided Kayak Tours on the Murray River during high flows.

At Canoe Adventures we are SO EXCITED that the Murray River is in a period of high flows. The last time we saw the river with flows as high as those predicted for this November/December, was in 2011, so get ready for an awesome time of exploring places that are often inaccessible; and creeks that don't often flow. Feel yourself unwind as you drift over floodplains amongst the redgums.

During this period of high flows we are offering a special series of guided tours, as detailed below. “But is it safe?”, I hear you ask. Our qualified instructor will take you to places where the flow is mild to moderate. Please note that we don't recommend these routes for unguided hires.

We have a number of options, as listed below. Please note however that they are subject to change or cancellation according to weather (e.g. strong wind), flow, vehicular access and attaining minimum participant numbers. Our booking terms and conditions are available here <http://www.canoeadventure.com.au/bookings-enquiries/>

Times indicated include vehicle transfer back to our starting point. Trips are one way, going with the flow.

Bookings are essential and can be made by phoning Kym on 04211 676 45
